

INTRODUCING...

## FLOWFAST MMA FLOORING

To minimize downtime and disruption to operations, Flowfast – Flowcrete UK's range of fast-cure MMA floor finishes – cures in just 60 minutes!

This fast track MMA flooring solution is available in a range of colours and finishes and is suitable for use in both commercial and industrial premises.

Methyl methacrylate technology results in fast track cure times.

Available in a range of flaked, quartz & solid colour swatches.

Resistant to a range of chemicals & cleaning agents.

Suitable for industrial or commercial applications.

Tailored slip-resistant profile for safety underfoot.

Formulations available that are suitable for wet areas.

**FLOWFAST SYSTEMS**

	THICKNESS	DESCRIPTION
Flowfast Quartz Classic	4 mm	A hand-trowelled, hard wearing, satin-finish floor topping made up of colour stable quartz granules in a clear acrylic resin binder, that cures in two hours.
Flowfast Quartz Classic for wet areas	5 mm	A hand-trowelled, satin-finish resin floor topping that cures in two hours and features a positively textured finish to reduce the risk of slips in wet conditions.
Flowfast Quartz Structure	4 mm	A fast track, hard wearing scatter and seal resin floor system with a textured satin finish and decorative quartz granules.
Flowfast Rapid Transit SR	5 mm	A fast track, fire-safe acrylic resin based floor system containing natural quartz aggregates, primarily for use in transport hubs and railway platforms.
Flowfast SHF	4 mm	A lightly textured, flaked floor topping for communal walkways and balconies in social housing, minimising disturbance during installation.
Flowfast Terrosso	4 mm	A seamless, decorative, hard wearing flaked floor finish developed for high traffic retail environments. Available with 1-3 mm or 5-7 mm flakes.

**WHAT'S THAT SMELL?**

Everyone loves the smell of chocolate chip cookies and homemade apple pie, but there are plenty of foods that smell nasty but still taste good:

Flowfast is just the same! Although it omits a unique odour during installation, this is completely safe and will drift away once the floor is cured.

To minimize downtime and disruption to operations, Flowfast – Flowcrete UK's range of fast-cure MMA floor finishes – cures in just 60 minutes!

When comparing the materials' speed of cure with other flooring systems, Flowfast always touches down first!

Material	Cure Time (minutes)
EPOXY	5
CEMENTITIOUS URETHANE	30
MMA - FLOWFAST	10
CEMENTITIOUS	40
TILES	30
